

That the FCC should not implement
any proposal that would lessen
Indiana's Telephone Privacy law
protections.

Before I was on the no call list I would recieve up to 10 calls a weeks, now I receive less then 1 a week, being only home for a few hours in the evening it is nice not to have the phone ringing the whole time I am home with Computers calling me and asking me to hold! And not having my answering machine compleatly used daily with messages from computers asking me to hold then playing music for 2 to 3 mins at a time.
